Hospital São Paulo: a teaching hospital

DCI/Unifesp

Since 1938, Hospital São Paulo has offered advanced technology in Medicine and become one of the best training centers for doctors, nurses and health professionals in Brazil

Besides presenting a large health care activity, the hospital also stands out as a reference in scientific production at national and international levels.

The institution hosts all medical specialties with a vocation for high complexity procedures. Its importance for the state and the municipality makes it responsible for the coverage of an area that reaches more than 5 million inhabitants in the city of São Paulo.

A traditional and modern university

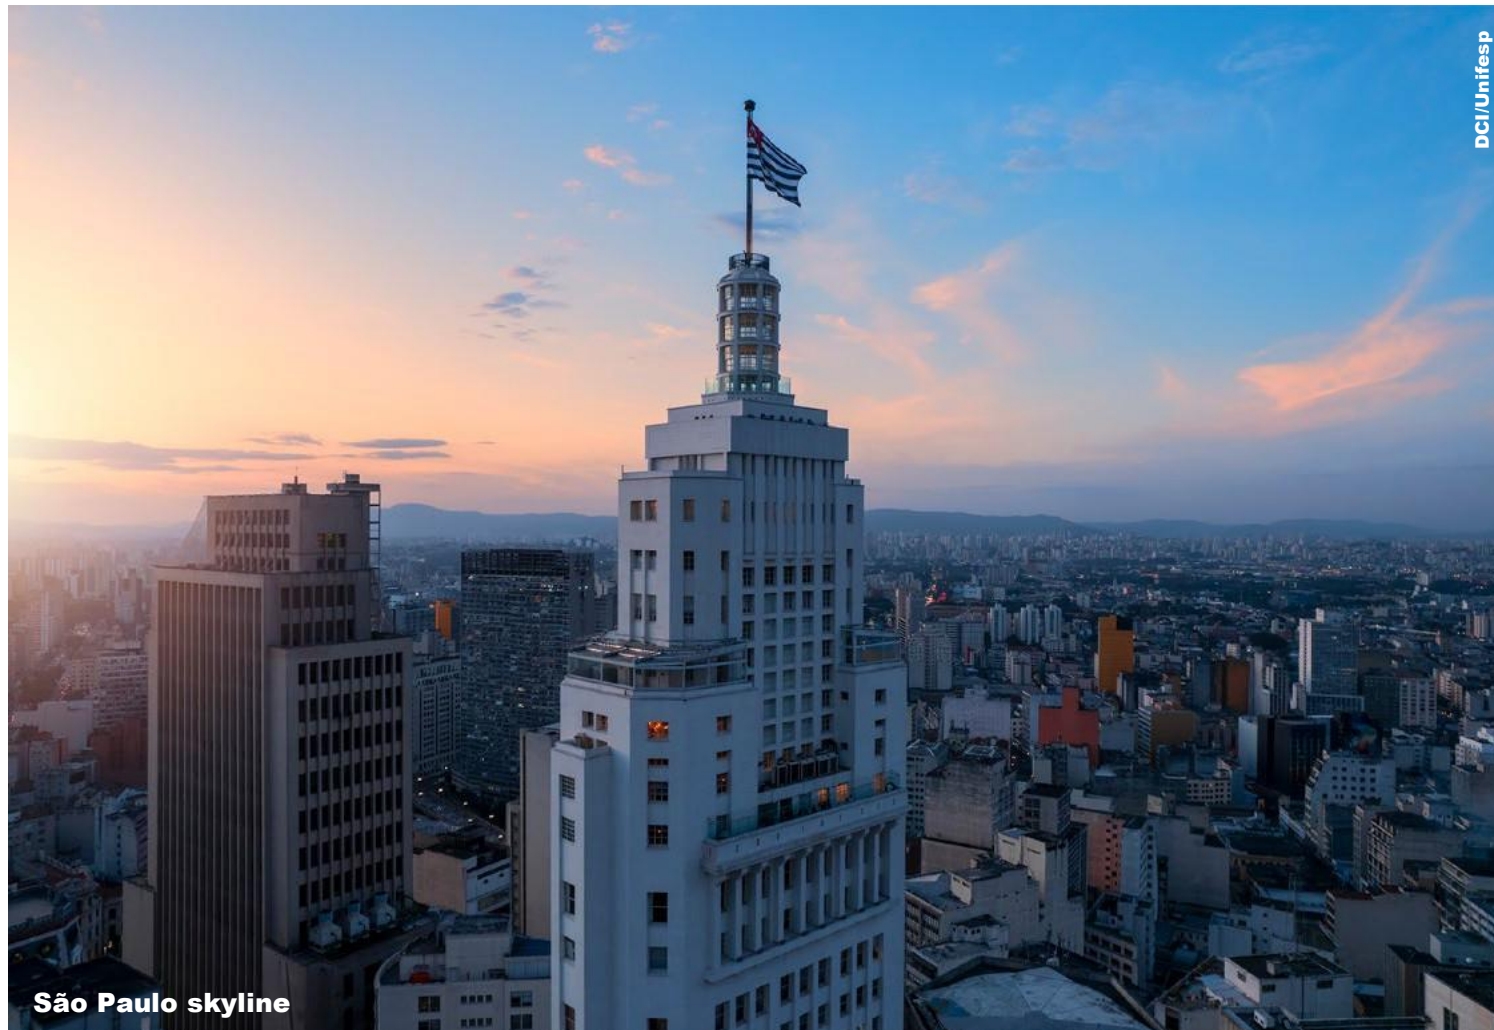

DCI/Unifesp

Rectory Building

The Universidade Federal de São Paulo (Unifesp) has its roots in 1933 when a private medical school was founded. It became a federal institution in 1956 and a federal university in 1994. Now it holds seven campuses (Baixada Santista, Diadema, Guarulhos, Osasco, São José dos Campos, São Paulo and Zona Leste) with 65 undergraduate courses, 72 graduate programs, 1,600 faculty members, 3,600 employees and 19,300 regular students.

Unifesp is considered one of the most important education and research institutions in Brazil and Latin America. It aims at promoting the country's social, economic and technological development by means of inseparable activities in education, research and extension.

Internationalization strategy

Unifesp's internationalization strategy is embedded within its Institutional Development Plans, including the current 2021-2025 plan. Since its inception, Unifesp has set the standard for excellence among Brazilian universities, renowned for its high-quality teaching and research. Through the establishment of numerous cooperation agreements with institutions worldwide, and active participation in international programs supported by both international organizations and the Brazilian government, Unifesp has made significant strides in accelerating its internationalization efforts.

The establishment of strategic partnerships with institutions of highest reputation has produced research outputs of international quality in issues of global significance. At the educational level, Unifesp aims at developing internationally recognized professionals, able to engage in professional practice in a variety of contexts both within and beyond their national boundaries.
